Installing eclipse on Ubuntu:

Eclipse is a Java-based application and it requires a Java runtime environment (JRE) to be installed in order to run

1. Install Specific Version of OpenJDK:

   Sudo apt install openjdk-8-jdk

2. Install the default OpenJDK package with-

   $ sudo apt install default-jre

3. Download and install the Eclipse snap package on your system, by typing-

   $ sudo snap install --classic eclipse

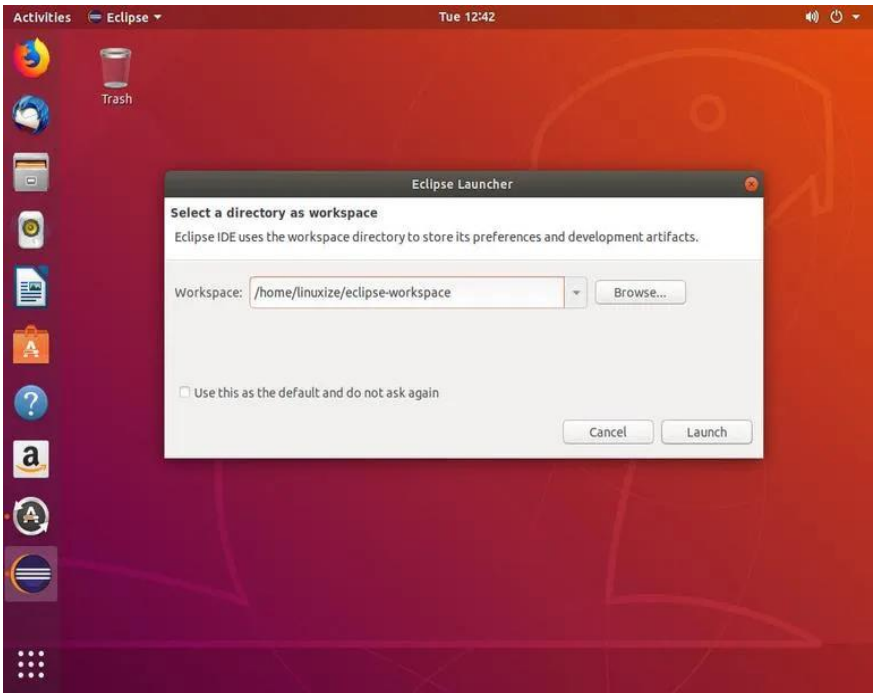
★ On successful installation of Eclipse, you should see the following output:

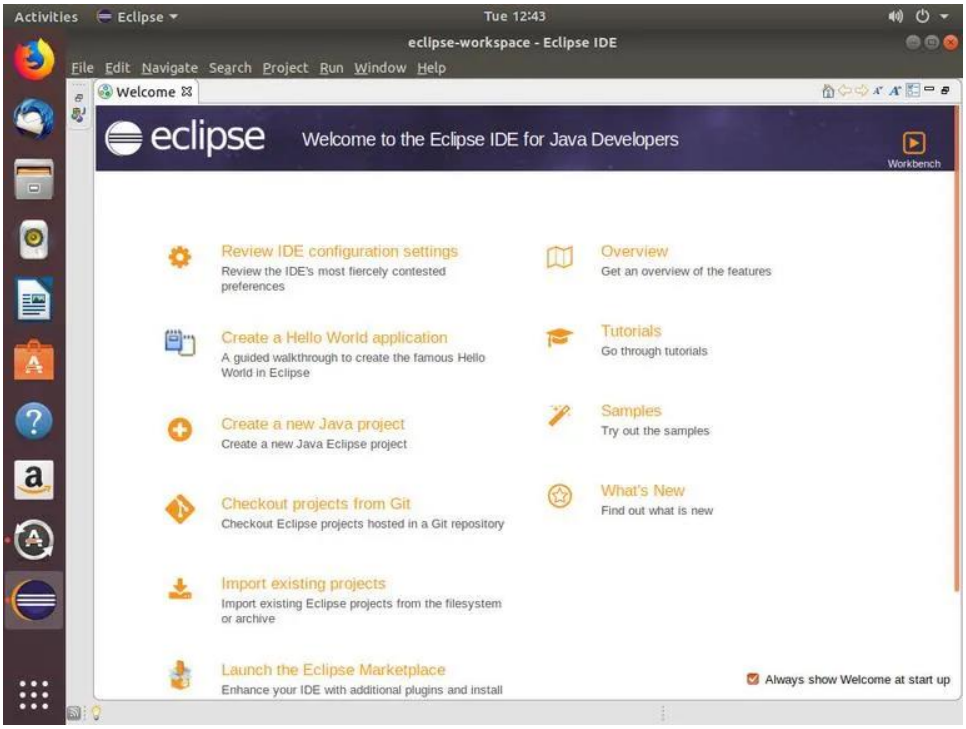
eclipse 2019-03 from Snapcrafters installed

Starting Eclipse:

Step 1: Now that Eclipse is installed on your Ubuntu system you can start it by clicking on the Eclipse icon

Step 2: When you start Eclipse for the first time, a window like the following will appear asking you to select a Workspace directory





Step 3: The default directory should be fine. Click `Launch` to proceed:
